In high-performing emergency departments, all nurses and physicians participate in making calls daily to create awareness about the strengths and opportunities that exist in the department. Department support staff, including greeters, volunteers, access/registration staff, etc., can also make discharge phone calls. When using non-licensed staff, it is critical to provide adequate training, use a standardized question template like the one below, and ensure there is a clear process for them to follow if the patient needs to be referred to a nurse or physician for follow-up.

To be completed at time of discharge:

1. In order to provide _______________ care, we would like to follow-up with a phone call in the next few days. May we have your permission to contact you? Yes No

2. Please verify your phone number: ________________________________

3. What is the best time to reach you at that number? Morning Afternoon Evening

4. Do you have any questions or concerns before you are discharged?
